

SUMMARY

**Natural Events During the Period of Iustinianos
as Narrated in the “Khronographia of Malalas”**

In this article, Dr. Esin Ozansoy presents a translation of the natural disasters (i.e. earthquakes) which Malalas of Antiocheia (Antakya) narrated in his “Khronikon”, a book of history about the events taking place during his life-time. The said events are concentrated mainly in two cities, namely those taking place in Antiocheia, the birth place of Malalas, and those in Konstantinupolis (İstanbul), after he had moved to that city to become an official at the Emperor’s Court.
